ABOUT ST. PAUL'S CHURCH AND THIS INDEX

Founded in 1822, St. Paul's Church is the oldest Roman Catholic parish in the Toronto area. It was founded at a time when few parishes existed for dozens, even hundreds of miles. At first it mainly serviced the needs of the Irish population who began arriving in numbers during the 1830s.

Not included in this book are marriages performed by Fr. Edward Gordon during the years 1830-33. Also, those unions of couples from 1822 to 1830 should be found in the Kingston parish register.

This index covers St. Paul's marriages from 1833 to the beginning of the twentieth century. It is a simple list except for the fact that the parents' names of marrying parties are added. As well, of course, date and place of marriage. Usually unions were performed at the church. But, at times, especially in the early days of a parish, they can be performed outside of a community as well.

For over 200 years Catholics have been part of the history of Toronto. This small work remembers once more those individuals who began their families here setting their place in its memory.

THE INDEX BY CATEGORIES AND HOW IT WORKS

This work covers some 2000 marriages performed over a 60 year period. In the early years of St. Paul's only the marriage witnesses' names were included in a marriage act and not the names of the parents. Therefore, it is common to find 'NG' or Not Given in the parent columns.

In a case of Brides and Grooms being widows this is not specifically mentioned here except in many of those entries where a bride's previous husband's name is recorded in the register, she will appear as, for example, Maria Jones alias or widow Smith.

This index uses soundex so that all those of the same name will be in their own category. For instance, in a group of Malloy listings could be found some spelled 'Malloye', 'Mulloy', 'Muloy', etc. In previous times names were written down as they sounded. Tremblay can be found in some documents as 'Tremblaye', 'Tremblais' or 'Trambley'.

Below are further explanations by category.

GROOM. This current work is indexed by groom. The surname will appear first and then order by one or more given names of individuals. A person's initials are not included unless they appear alone in an act. If persons have more than one surname these are also included.

BRIDE. The surname (or family name) will appear first followed by the given name below. If the bride is a widow and her previous spouse's name is in the marriage act then she will be listed also with that name as 'widow Smith' for instance. In cases where 'alias' appears it is on account of this being the word written in the register.

PTS. GROOM/PTS. BRIDE. Parents' names of contracting parties almost always appear exactly how the register gives them. If an act only says "son of John and Martha" this should be realized as such in the column. Likewise for "son of John Jones and Martha Jones" or for "son of John Jones and Martha Tremblay". If names are not included in a written act then 'NG' appears in the column(s). If there is a note about a couple being related such as 'Third Degree of Consanguinity' (Second Cousins) it may appear in the columns.

DATE/PLACE. The European system of dating is used for this book: day, month, year (dd,mm,yy). The months under ten are easily seen preceded by a zero (0). All marriages with only a few exceptions are written as having been performed in Toronto.

TABLE OF NAME ABBREVIATIONS

161

ABBREVIATION	NAME
Bgt/Brg	Bridget
Cath	Catherine
Chas	Charles
Dani/Danl	Daniel, Danny
